

Regarding docket number MB Docket 04-232

To whom it may concern,

As a small market radio owner and broadcaster I wish to express to you my strong concerns regarding the FCC's proposed rule requiring broadcasters to record and retain all programming. Such a rule would place tremendous, perhaps devastating financial and labor distress on our small station. The cost associated with having to record and store thousands of hours of programming would be a burden not only directly financial but also to any future or current staff hirings, and programming we are able to offer for our communities. The negatives of mandatory recording far out way any positives that could possibly come of it. I respectfully request that you accept my comments regarding the FCC's proposed Mandatory Recording rule and that you not proceed with its granting.

Sincerely,

William G. McVicar

Owner

WQDY Inc.
